

ISO 2022 testing simplified

# Customer Onboarding

Onboarding made easy for your corporate clients

## Onboarding Made Easy

Empower Your Corporate Clients  
for Your E-Banking Channels

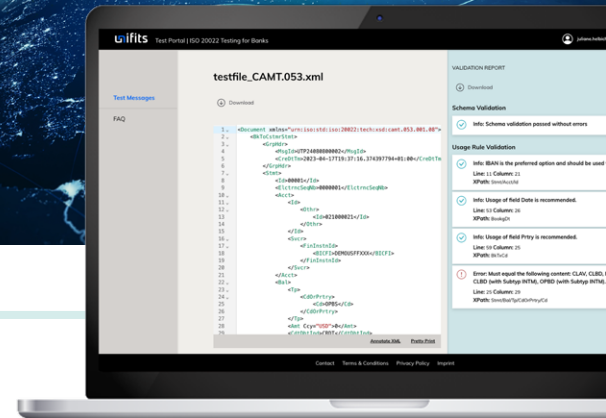

With Unifits Customer Onboarding, you guide your corporate clients seamlessly through the evolution of payment transactions – especially during the ISO 2022 migration.

The platform reliably validates submitted payment messages for full compliance with all relevant standards, ensuring error-free processing.

In addition, clients can independently test their payment and ERP systems – without the need for support from banking specialists.

This reduces internal workload, speeds up onboarding, and improves the quality of electronic payments.

**Unifits Customer Onboarding – the smart solution for modern corporate client onboarding.**

## The benefits at a glance

- ✓ Significantly reduced effort for the bank thanks to a self-service-oriented testing portal
- ✓ All relevant tests are easily performed by corporate clients themselves, with test results available immediately
- ✓ Smooth implementation and reduced project-related and operational risks through seamless integration of our software
- ✓ Increased transparency for both client and bank thanks to comprehensive testing statistics
- ✓ Satisfied clients and added value for everyone

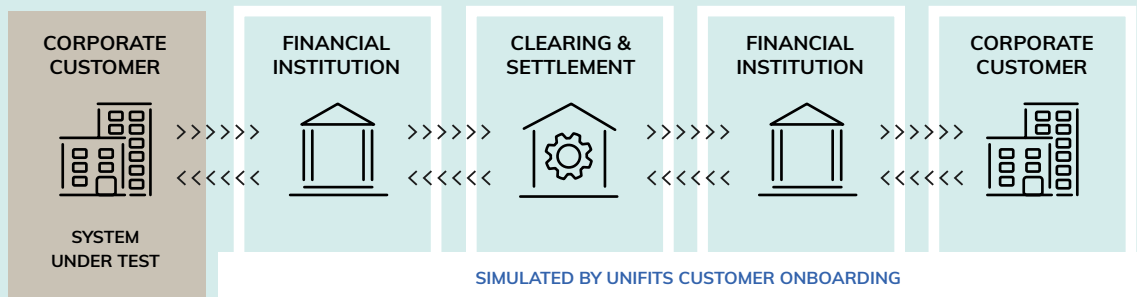

## With the trust of the industry

## Functionality

### Customer Onboarding at an Entirely New Level

The application validates all types of message formats used for initiating payments. It generates messages for bank-to-customer reporting and simulates incoming payments by accurately replicating the bank's relevant systems. Self-registration and user-friendly design ensure easy operation without the need for training. A high level of reliability and security is guaranteed through external penetration testing, while comprehensive statistics provide the transparency you need regarding your corporate clients' testing progress.

### The Smart Solution

Onboarding Made Easy for Your Corporate Clients

- ✓ Significantly Accelerated Testing Processes
- ✓ Convenient Self-Service and Support for All Use Cases
- ✓ Satisfied Clients Thanks to Excellent Onboarding Support

The Unifits onboarding platform has significantly simplified our processes in harmonizing Swiss payment transactions. Customers and partners can perform their tests independently and flexibly, making the process more efficient for everyone involved.

The 24/7 available self-service reduces manual effort and contributes to higher quality in processing payment orders.

What makes working with Unifits especially valuable is their commitment to topics like ISO 20022 and quality assurance. Thanks to reliable technology and straightforward communication, Unifits is a trusted partner for us.
