

ISO 2022 testing simplified

# Unifits Test Portal

## The Free Validation Service

### Create and validate ISO 2022 XML messages with ease

The Unifits Test Portal is designed for testing teams in banks and financial institutions and addresses one of the key challenges in the ISO 2022 environment: the creation and validation of schema-compliant messages.

While the concept sounds simple, it often involves significant effort in practice. Extensive XML schemas and numerous technical rules make the manual creation and validation of messages complex and time-consuming.

The Unifits Test Portal supports all relevant ISO 2022 testing scenarios and increases testing efficiency by up to 90%. Messages can be generated quickly, adapted to specific requirements and validated automatically.

### At a glance

- ✓ **Industry-leading validation service – free of charge:**  
 Unifits testing and validation services have been trusted by the industry for more than a decade
- ✓ **One solution for all clearing and settlement systems:** no matter if they are High Value payments, Real-Time payments, or Mass & Retail payments
- ✓ **Developed by industry experts:**  
 Built by specialists with deep industry expertise, ensuring technical accuracy and comprehensive rule coverage
- ✓ **Up to 90% less effort when creating test messages:**  
 checking issues field by field, the tedious and error-prone creation of test messages is a thing of the past

START NOW

## We invite you to give it a try!

After years of focusing on one topic, simplifying transaction testing, Unifits can provide you with our best of breed validation service for free. And if that isn't enough, there is also a test message creation service provided.

## FUNCTIONALITY

# Validate, Create, Derive

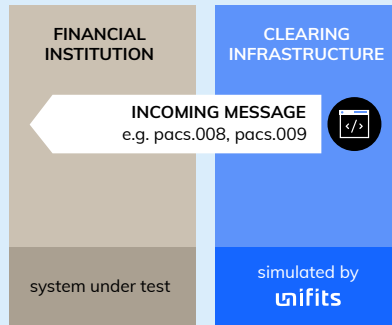

## Unifits supports all relevant use cases

The application perfectly supports all required use cases: validate outgoing messages, create incoming messages, derive response and request messages.

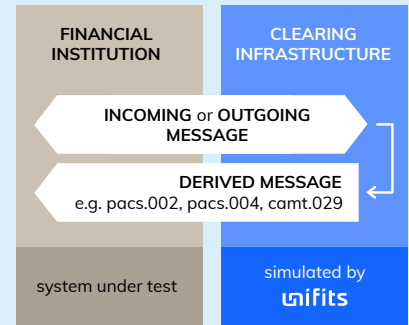

### Validate outgoing message

### Create incoming message

### Derive response and request message

## COMPATIBILITY

# Wide range of clearing schemes

The Unifits Test Portal meets the guidelines of a wide range of clearing schemes and covers all types of clearing and settlement mechanisms. Numerous schemes for High Value payments, Real-Time payments, or Mass & Retail payments as well as the new CBPR+ standard for bilateral clearing are supported.

If you are missing a scheme, please just contact us to let us know your need. In free mode, only a part of the schemes is unlocked for testing, also we are constantly implementing more new schemes.
